Weekly Coal Production

Production for Week Ended:
April 11, 1992

Summary

U.S. coal production in the week ended April 11, 1992, as estimated by the Energy Information Administration, totaled 19 million short tons, a 7-percent increase from production in the previous week and about the same as in the comparable week in 1991. Production East of the Mississippi River

totalled 11 million short tons and production West of the Mississippi River totaled 7 million short tons.

Coal production in March 1992 was estimated to total 83 million short tons, slightly higher than in February, but slightly lower than in March 1991.
